Index of Species

Page numbers in italics refer to the subjects of the paper.

Acraea encedana, 467
Acraea encedon, 467
Acrida lata, 92
Aedes spp, *253–258*, 386
Aedes aegypti, 194, *253–258*
  albopictus, *253–258*
  alcasidi, *253–258*
  bahamensis, *253–258*
  canadensis, *253–258*
  cinereus, *253–258*
  communis, *253–258*
  cooki, *253–258*
  excrucians, *253–258*
  flavopictus, *253–258*
  hebrideus, *253–258*
  heischii, *253–258*
  katherinensis, *253–258*
  malayensis, *253–258*
  metallicus, *253–258*
  polynesiensis, *253–258*
  pseudalbopictus, *253–258*
  seatoi, *253–258*
  scutellaris, *253–258*
  stimulans, *253–258*
  triseriatus, *253–258*
  unilineatus, *253–258*
  zoosophus, *253–258*
Aegilops umbellulata, *33–45*
Adalia bipunctata, 55, *273–277*
Adalia decempunctata, 275, 276, 277
Apeltes quadracus, 195
Allium spp *119–128*
Allium: subgenera and sections, 122–123, 126, 127
  aflatunense, 120, 123
  altaicum, 120, 122
  ampeloprasum, 120, 123
  angulosum, 120, 122, 124
  atropurpureum, 120, 123
  barsczewskii, 120, 122
  carinatum subsp. *carinatum*, 120, 123, 124, 125
  carinatum subsp. *pulchellum*, 120, 123, 125
  cepa, 119
  cernuum, 120, 122, 124
  cristophii, 120, 123
  farreri, 120, 122
  fistulosum, 120, 122, 124
  flavum, 120, 122
  galanthum, 120, 122, 124
  geyeri, 120, 122
  giganteum, 120, 123
  globosum, 121
  heidreichii, 120, 123
  karataviense, 121, 123, 124
  lineare, 120, 122
  macleanii, 121, 123
  mairei, 120, 122
  moly, 120, 122, 124
  obliquum, 120, 122, 124
  ochroleucum, 120, 122
  oleraceum, 120, 123
  oreophyllum, 120, 122, 124
  parciflorum, 120, 123
  porrum, 120, 123, 124
  pskemense, 120, 122
  rosabachianum, 121, 123
  roylei, 120, 122
  saxatile, 120, 122
  schoenoprasum, 120, 122, 124, 125
  schorzonerifolium, 120, 122
  schubertii, 121, 123
  sphaerocephalon, 120, 123
  stipitatum, 121, 123
  trifoliatum, 120, 122
  triquetrum, 120, 123, 124
  ursinum, 120, 123, 124, 126, 127
  victorialis, 120, 122
  wallichii, 120, 122
Anser caerulescens, 196
Apis mellifera, 184, 194
Apis mellifica, 194, 257
Arianta arbustorum, 194
Ascobolus, *63–71*
Ascobolus immersus, 67, 68
Asellus aquaticus, 194
Arcyptera fusca, 178
Arctypera tornosi, *173–180*

Baetica ustulata, 443
Bidens amplectus, *327–336*
  asymmetrica, *327–336*
  camphylotheca, 329
  cervicata, *327–336*
  cosmoides, *327–336*
  forbesii, *327–336*
  hawaiensis, *327–336*
  hillebrandiana, 329
  macrocarpa, 329
  mauiensis, *327–336*
  menziesii, *327–336*
  micrantha, *327–336*
  molokaiensis, *327–336*
  populifolia, *327–336*
  sandvicensis, *327–336*
  torta, *327–336*
  valida, 329
Biston betularia, 273, 277, 302
Biston betularius, 55, 60
Blepharis maderaspatensis, 468
Brachidontes rostratus, *355–362*
Branta canadensis, 197

Caledia captiva, 443
Cepaea nemoralis, 194
Chironomus, 257
Chorthippus brunneus, 242
Chortoicetes terminifera, 242
Chrysochraon dispar, 242
Cirsium arvense, 446
Climacium americanum, *337–343*
Climacium dendroides, 337
Climacium kindbergii, *337–343*
Conoephalum conicum, 342

Coregonus lavaretus, 195
Crassostrea gigas, 188, 194
Crassostrea virginica, 194, 356
Crenomytilis grayanus, 355
Crumenulopsis sororia, *423–430*
Culex quinquefasciatus, 194
Cyprinus carpio, 195

Danaus chrysippus, *467–475*
Danaus gilippus, 468
Danaus plexippus, *213–221*
Daucus, 233
Deloyala guttata, 194
Dicrostonyx torquatus, *383–389*
Dicrostonyx t. chioropaes, 384, 387
Dicrostonyx t. torquatus, 384, 387
Drosophila, 91, 182, 184, 188, 189, 253, 257, *301*, 383, 386
Drosophila buzzatii, 405
  erecta, *245–251*
  funebris, 405
  hydei, 250, 405
  immigrans, 405
  mauritana, *245–251*, 405
  melanogaster, *73–83*, *95–104*, 142, 179, *227–236*, *245–251*, *259–264*, *405–411*
  mojavensis, 405
  orena, *245–251*
  pseudoobscura, *235–259*, 260, 263
  sechellia, *245–251*
  simulans, *245–251*, 264, 405
  subobscura, 96, 250
  teissieri, *245–251*, 405
  tripunctata, *363–369*
  yakuba, *245–251*, 405
Dysdercus bimaculatus, 188, 194

E. coli, 149, 304
Eichhornia crassipes, 14
Eichhornia paniculata, *7–17*
Enoplognatha ovata, 61
Eucalyptus regnans, *161–171*
Euchorthippus, 85, 90, 91
Eurytemora affinis, 184, 194
Eurytemora herdmani, 184, 188, 194
Eyprepocnemis plorans, *85–93*, *237–243*

Ficedula albicolis, 197
Ficedula hypoleuca, 197

Gambusia affinis, 188, 195
Gasterosteus aculeatus, 195
Gehyra purpurascens, 142
Geospiza conirostris, 197
Geospiza fortis, 184, 197
Geospiza scandens, 184, 197
Gibasis karwinskyana, 126
Glossina morsitans, 194
Graptemys ouachitems, 196
Gryllus firmus, 184
Gryllus integer, 194
Guekensia demissa, 355

Hawaiian *Bidens*, *327–336*
Helicornis erato, 194
Heliothis zea, 194
Homatus americanus, 188, 194
Hordeum vulgare, *285–292*, *285–292*, *293–299*

Hyphantria cunea, 194
Hypolimnas bolina, 467, 468
Hypolimnas misippus, *467–475*

Ictalurus punctatus, 195

jack pine, *279–283*

Klebsiella pneumoniae, 398

Lathyrus, 126
Lebastes reticulatus, 195
Linum usitatissimum, 266
Locusta, 91
Lolium, 126
Lolium perenne, *129–134*
Lolium temulentum, *129–134*
Lotus corniculata, 265, 269, 270
Lucilia cuprina, *371–381*
Lycopersicon esculentum, *413–421*
Lycopersicum pimpinellifolium, *413–421*
Lygaeus kalmii, 195

Macaca mulatta, 197
Macaca radiata, 197
Macrobrachium rosenbergii, 195
Macropalus opercular, 195
Maniola jurtina, 195
Melanocrommym, 127
Melospiza medodia, 197
Microseris, 126
Mormoniella, see *Nasonia*
Mus musculus, 197, 383
Musca domestica, 195
Myopus schisticolor, 384
Mytilus californianus, 355
Mytilus edulis, *117–118*, 355, 356
Mytilus galloprovincialis, 355
Myrmeleotettix maculatus, 242

Nasonia vitrispennis, *47–53*
Natrix sipedon, 196
Nemophila menziesii, 334
Nezara viridula, *391–395*
Nicotiana, 298
Nicotiana glauca, 298
Nicotiana langsdorfii, 298
Nicotiana tabacum, *223–226*

Oedipoda charpentieri, *441–444*
Oedipoda coerulescens, 441
Oedipoda fuscocincta, 441
Oenothera laciniata, 341
Oncopeltus fasciatus, 188, 195
Oncorhynchus kisutch, 195
Oncorhynchus nerka, 195
Oncorhynchus tshawytscha, 195
Oryzias latipes, 195
Osmia lignaria, 195

Panicum maximum, 341
Papilis dardanus, 467
  glaucus, 467
  memnon, 467
  polytes, 467
  polyxenes, 449–455
Paramecium bursaria, *397–403*

Paramecium caudatum, 402
Paramecium octaurelia, 399, 402
Parapleuras alliaceus, 242
Partula suturalis, 195
Partula taeniata, 195
Parus caerulus, 197
Parus major, 197
Pellia endiviifolia, 342
Peromyscus gambeli, 197
Peromyscus rubidus, 197
Peromyscus sonoriens, 197
Philaenus spumarius, *445–448*
Pityohyphantes phrygianus, *55–61*
Plagiochila asplenioides, 341
Plantago laceolata, 31
Plethodon cinereus, 184, 196
Podisma pedestris, *457–466*
Poecilia reticulata, 195
Portulaca quadrifida, 468
Pseudocalanus, 184, 188, 194
Puffinus puffinus, 197

Racopilum cuspidatum, 342
Racopilum spectabile, 342
Rana pipiens, 196
Rana temporaria, 196
Rattus norvegicus, 197
Ruellia cordata, 468
Ruellia prostrata, 468
Rumex acetosa, *135–143*

Salmo gairdneri, 188, 196
Salmo salar, 188, 196
Salmo trutta, 196
Sarcophaga bullata, 48
Schizosaccharomyces pombe, 68
Senecio squalidus, 353–354
Sminthopsis crassicaudata, 241
Sordaria, *63–71*
Sordaria brevicollis, 67, 70
Sordaria fimicola, 67, 68, 70
Sorex araneus, *345–351*
Sphagnum pulchrum, 341
Spirorbis borealis, 195
Stethophyma grossum, 242
Sturnus vulgaris, 197

Taraxacum officinale, 341
Tetrahymena, 398
Thamnophis elegans, 196
Thymus vulgaris, 31
Tilapia mossambila, 196
Tilapia nilotica, 196
Tilia spp., 274
Tribolium castaneum, 184, 195
Trichopoda pennipes, 392
Trifolium repens, 31, *265–271*
Triturus cristatus, 242
Triturus helveticus, 242

Urtica dioica, 274

Vicia faba, 446

Xenostrobus pulex, *355–362*

Zea mays, 105, 126, 142
Zoarces viviparus, 196

Subject Index

activity times, differences in, in *Drosophila*, 213–221
air pollution and melanism in ladybirds, 273–277
allele frequencies in *Eucalyptus*, 161–171
allozyme heterozygosity, 279–283
amylase gene duplication in *Drosophila*, 145–151
analysis of quantitative trait loci in tomato, 413–421

B-chromosomes and chiasma distribution, 237–243

C-banding pattern and paracentric inversion in a grasshopper, 441–444
chiasma frequency in a grasshopper, 237–243
chiasma frequency in colchicine-treated meiocytes, 353–354
chromatin types in *Arcyptera*, 173–180
chromosomal rearrangement and speciation, 1–6
chromosome inversions in *Drosophila*, 95–104
chromosome order, Bennett's predictions of, 321–325
chromosome recombination in wheat-*Aegilops*, 33–45
colour phenotypes in a spider, 55–61
colour polymorphism in spittlebugs, 445–448
conjugation in *Paramecium*, 397–403
continental and island populations of *Eichhornia*, 7–17
control genes, meiotic pairing of, 129–134
cyanogenesis in white clover, 265–271

detoxification of ethanol and isopropanol in *Drosophila*, 405–411
detrimental load in *Drosophila* populations, 227–236
DNA variation in *Allium*, 119–128
double-strand gap repairs in fungi, 63–71

esterase-6 variation in *Drosophila*, 259–264
extra chromosomal factor, transmission of, in a wasp, 47–53

fitness components, heritability of, 181–197
fitness modifier, mapping of, in *Lucilia*, 371–381
foraging in *Drosophila*, 73–83

genetical expectation in test crosses, 105–115
genetic control of polymorphism in spittlebugs, 445–448
genetic differentiation of populations, study of, 199–212
genetic neighbourhood estimation, 29–32
genetic polymorphism in *Drosophila* population, 227–236
genetics of a pentatomid bug, 391–395
genetics of a polymorphic mimetic butterfly, 467–475
genetics of barley, 285–292, 293–299
genetics of gynodioecy, 327–336
genetics of oviposition site preference, 363–369
genetic variability and phenotypic plasticity, 449–455
genetic variability of polygenic traits, 19–28
genetic variation, electrophoretically detectable in moss, 337–343
genetic variation in *Danaus*, 213–221
genetic variation in *Eichhornia*, 7–17
grasshopper translocation heterozygotes, 85–93
growth patterns in plants, 29–32
gynodioecy, genetics of in *Bidens*, 327–336

heritability, estimation of, 183–184
heritability of fitness components, 181–197
heterocromatin and RE resistant chromatin in a grasshopper, 173–180
heterozygosity and phenotypic variation, 19–28
heterozygosity in Jack pine, 297–283
heterozygous deficits in loci in marine mussels, 355–362
homogamy in a hybrid zone, 457–466
hypervariable Y chromosomes in *Rumex*, 135–143

immature embryo response, genetic analysis of, in barley, 285–292
induction of conjugation in *Paramecium*, 397–403
isopropanol and ethanol ingestion in *Drosophila*, 405–411
isozyme markers, in estimation of a mating system, 423–430

karyotypic variation in shrews, 345–351

mapping a fitness modifier in *Lucilia*, 371–381
mating system in a fungal pathogen, 423–430
means and variances of test crosses, 105–115
meiotic drive in lemmings, 383–389
meiotic gene conversion in fungi, 63–71
meiotic pairing control genes, 129–134
melanism in a spider, 55–61
melanism in ladybirds, 273–277
multivalent formation, effects of, on chiasma frequency, 353–354
mutant for somatic hybridisation, 223–226

nuclear DNA content in mosquitos, 253–258
nuclear DNA variation in *Allium*, 119–128

outcross pollen pool of *Eucalyptus*, 161–171
oviposition site preference in *Drosophila*, 363–369

paracentric inversion in the grasshopper, 441–444
paternal inheritance in a wasp, 47–53
plant breeding programs, predicting success of, 431–440
polygenic traits, variability of, 19–28
polymorphism and mimicry in a butterfly, 467–475
polymorphism of amylase in *Drosophila*, 245–251
predicting chromosome order, 321–325
preference of oviposition site in *Drosophila*, 363–369
pupal colour in *Papilio*, 449–455

quantitative characters, selection of, 199–212
quantitative trait loci in tomato, 413–421

random association of alleles, test for, 117–118
reciprocal differences and *in vitro* genetics of barley, 293–299
reciprocal translocation heterozygotes, 85–93
recombination of *Aegilops* and wheat chromosomes, 33–45
reproductive isolation, electrophoretic evidence of, 337–343
restricted gene flow, effects of, 29–32
rover/sitter polymorphism in *Drosophila*, 73–83

selection for development times in *Drosophila*, 95–104
selection interaction in marine mussels, 355–362
sex chromosomes, meiotic drive in, 383–389
sexual selection, responses to, in a pentatomid bug, 391–395
speciation, chromosomal, 1–6
statistical power in plant breeding programs, 431–440

testcross performance of genotypes, 105–113
test for random association of alleles, 117–118
translocation heterozygotes in a grasshopper, 85–93

variation at esterase-6 locus in *Drosophila*, 259–264
variation in nuclear DNA in mosquitos, 253–258
variation, karyotypic, in shrews, 345–351
variation of nuclear DNA in *Allium*, 119–128

Wheat-*Aegilops* recombination, 33–45

Y-chromosomes in *Rumex*, 135–143
